

Typical savings using Scale-X fluid control technology verses the conventional methods of scale control.

Using Scale-X fluid control technology	Average reduction in efficiency	Increase in energy usage & Increase in running costs
System remains clean continuously	0%	0%

Using a chemical dosing & Chemical cleaning regime	Average reduction in efficiency	Increase in energy usage & Increase in running costs
Very well maintained system	10 to 12%	11 to 14%
Typically maintained system	15 to 25%	18 to 33%
Poorly maintained system	30 to 50%	43 to 100%
